Dear Mr. Warmann:

Please find enclosed a modified Department of Environmental Protection's (DEP) Plan Approval to construct, modify, reactivate, or install an air cleaning device on an air contamination source. Please note that the Plan Approval was modified due to an oversight. The following conditions in Section C of the Plan Approval were added or revised:

- Condition #002(d) was added to state the use of 1.08 tons NO_x Emission Reduction Credits (ERC) in Pennsylvania's Registry for the project.
- Condition #002(f) was modified to address that Monroe Energy, LLC has provided the required amount of NO_x ERCs for the project.

This Plan Approval contains special conditions that must be fulfilled. Failure to do so violates Section 127.25 of DEP's rules and regulations, which may result in enforcement action and denial of an Operating Permit.

A DEP operating permit will be issued if (1) the special conditions incorporated within the Plan Approval have all been fulfilled; (2) DEP is satisfied that the project was carried out as proposed in the application, and that the operation of the source(s) and any associated air pollution control equipment conforms with the operational information stated on the application; and (3) DEP is satisfied that the air contaminant emissions from the source(s) comply with the requirements specified in, or established pursuant to, all applicable DEP rules and regulations.
